

Cybercom NatureIT - Technical product sheet

Are you fed up with the extensive paperwork when administrating fishing permits, hunting, forest services, trails and accommodation? Try our effective cloud service NatureIT, which digitally helps you manage sales, administration and follow-up of these services.

Functions

Functions for your visitors

- Purchase different kinds of permits (e.g. fishing permits) via the internet, mobile application and retailer
- A fast, secure and simple payment solution
- Activate visiting-, hunting- and fishing days
- Report back, e.g. catch reporting
- Help function

Administrative functions

- Create areas and trails on a digital map. E.g. fishing areas, trail areas, trails, lakes and streams
- In a simple way create different types of products such as fishing permits, trail permits etc.
- Add points of interests (POI) to a map
- Set quotas for numbers of visitors per day in an area for a specific period.
- Prohibit activities in an area for a specific period.
- Handles different currencies.
- Support for multiple languages.
- A fast, secure and simple payment solution.
- Reports, such as sales statistics and compilation of catch reporting.
- Help function
- If there is need of a report or a function which doesn't exist today, it can be created.

Launched services today

- Administration and sales of fishing permits in Finnmarkseiendommen in northern Norway.
- Administration and sales of permits to chop your own wood in Finnmarkseiendommen.
- New applications will be launched during 2013.

Customers

- Authorities
- Private businesses
- Commercial businesses
- Organizations

Mobile phone

The portal is mobile adapted, thus all functions are available using a smart phone.

Mobile application exists today for android to download for free from Google play. Functions such as buying permit, show permit and report back exists. Extensions of functions are possible.

Maps

- NatureIT uses MAPSERVER together with TileCache as map server
- Today maps from *Lantmäteriet* are used for Sweden. Maps from *Statkart* are used for Norway. MAPSERVER supports the most common formats of map data
- Customer adapted map layers

Technical demands on PC/MAC

Only a common web reader that works on a PC/Mac is required.

Database

The database is a MySQL. <http://www.mysql.se>

Development- and production environment

Production and development of interfaces and functions are done in Drupal. <http://drupal.org/>

Production

The production of NatureIT is handled by Jamtport AB in Östersund. <https://www.jamtport.se/>

Availability

Jamport AB can guarantee an availability on 99,2%.

Support

We have an efficient and experienced support organization that can help with eventual problems or questions.

When required, for instance at start of hunting season, extra support can be ordered.

The model?

NatureIT is bought as a service with a monthly fee. Normally no adaptations at start with NatureIT are necessary; it means no start up investment. In cases it is desired customer adaptation can be done.

Demonstration

Below there is a link to a short demonstration movie which shows how easy it is to create fishing water and a fishing permit in NatureIT.
